## Apple Inc.

Dear Tim Cook,

In my youth I was a big fan of yours and to this day I am a supporter of Apple products. My goal has been and always will be development. I think that my academic qualities and creativity in development ideas will have a positive impact on the development of your company and the realization of your goals. Thanks to my experience working in various large companies in the world, I was able to improve my programming skills, in developing and solving various problems. I devote almost all my time to finding various ideas in the field of development and programming.

In my opinion, these qualities correspond to what the software engineer you are looking for should have. I want to be part of the history of this great company. It will be a great honor for me to work for the company that Steve Jobs once founded.

I am really sure that my approach to work, unusual approaches in developing ideas for programs will become an important asset in your company. I look forward to meeting you and the opportunity to become a software engineer in your company.

Yours faithfully,

Ayan Sultan
